Our traditional porcelain urinals are found in unique heritage bathroom projects across the country.

Find the perfect urinal configuration for your men's bathroom.

Wall-Hung Urinals

The traditional styled Florida urinal is the best-selling model. Manufactured from ceramic with white or black glaze, the Florida is hand-made using traditional techniques.

These urinals adorn men's washrooms across the globe. From Jamie Oliver's restaurants, to the Chifley Tower Art Deco skyscraper in Sydney, Australia, the originals can even be found at the hallowed grounds of the iconic Lord's Cricket Ground in St John's Wood, London.

Wall-Hung Urinals

URINALS: WALL HUNG
PIPEWORK: CONCEALED
SENSOR: WALL OR CEILING
EXTRAS: PRIVACY PANEL

Floor-Standing Urinals

The Niagara floor standing urinal can be installed as an individual stall urinal and will give distinctive style to any washroom whether traditional or contemporary.

They can be placed adjacent in a row with our ceramic covers over the join where they abut. There are also ceramic foot-plates for the floor to give further design detailing in keeping with their traditional styling.

URINAL: FLOOR STANDING

URINAL: FLOOR STANDING
PLACEMENT: ABOVE FFL
PIPEWORK: CONCEALED
SENSOR: WALL OR CEILING
EXTRAS: FOOTPLATE

Flush Sensors

Urinals need to be flushed after use. The modern system is to have the flush system concealed in the wall behind the urinal and we refer to this as the “rear water inlet”.

We can supply flush mechanisms designed and produced by Enviro-Tech who specialise in sensor-operated urinals, toilets and taps. Their website is www.enviro-tech.co.nz and being a NZ based company they readily assist with advice.

Our Five Star WELS rating is based on using their economical urinal flush units with a flush of 0.8 litres per flush.
